

Daniel A. Russell

EDUCATION

- Ph.D. Acoustics 1995** The Pennsylvania State University
The Theory of Fuzzy Structures and Its Application to Waves in Plates and Shells. Mid frequency analysis of the effects of a statistical distribution of fuzzy attachments on the vibration of plates and shells, and the related radiation and scattering of sound from cylindrical shells and plates with fuzzy attachment. Contributed to the Pierce-Sparrow-Russell model of fuzzy structures.
- M.S. Applied Physics 1991** Northern Illinois University
Residual Shock Spectrum of Piano Hammers: An Experimental Study of Hammer Felt Nonlinearity and Energy Transfer Efficiency. Investigation of the nonlinear behavior of piano hammer felt using residual shock spectrum and mapping the frequency content of the shock spectra to explain the frequency content of resulting struck string spectra.
- B.S. Physics 1988** Bradley University
- B.Mus. Piano Performance 1988** Bradley University

ACADEMIC POSITIONS HELD

- Teaching Professor of Acoustics & Distance Education Coordinator Since 2011**
GRADUATE PROGRAM IN ACOUSTICS, PENNSYLVANIA STATE UNIVERSITY, UNIVERSITY PARK, PA
Developing and teaching graduate courses in acoustics, sound and vibration, and noise control to both resident and distance education graduate students pursuing masters and doctoral degrees in acoustics. Overseeing, marketing and managing the distance education component of acoustics instruction, including oversight of the M.Eng. in Acoustics online degree program. Conducting research on the acoustics and vibration of sports equipment.
- Associate Professor of Applied Physics (Acoustics) 1999-2011**
Assistant Professor of Applied Physics (Acoustics) 1995-1999
PHYSICS DEPT, KETTERING UNIVERSITY, FLINT, MI
Developed and taught several upper-level undergraduate elective courses in acoustics and vibration including lecture and laboratory components. Developed and taught senior level advanced laboratory course in acoustics. Developed and oversaw academic minor in acoustics. Developed, equipped, and managed acoustics laboratory for faculty and student research projects. Mentored undergraduate students on research projects and undergraduate theses in acoustics. Conducted research on the acoustics and vibration of sports equipment (baseball bats, hockey sticks, rackets) and musical instruments. Also taught introductory and mid-level core lecture and laboratory courses toward physics degree (mechanics, electricity & magnetism, physics of waves, computational physics, theoretical mechanics).
- Teaching Assistant, Pennsylvania State University, State College, PA Spring 1995**
Developed lecture material for and taught one third of ACS 402, the undergraduate course in acoustics.
- Physics instructor, Bradley University, Peoria, IL Spring 1991**
Taught both the mechanics and electricity lecture components of the two-term introductory calculus-based physics sequence.
- Teaching Assistant, Northern Illinois University, DeKalb, IL 1989-1990**
Taught the mechanics and electricity laboratory components of the two-term introductory non-calculus based physics course sequence.

**ACOUSTICS
TEACHING AT
PENN STATE
(2011 TO PRESENT)**

GRADUATE COURSES DEVELOPED AND TAUGHT AT PENN STATE (2011 – PRESENT)

ACS-402, Introduction to Acoustics (3 lecture credits)

Physics of oscillation and wave motion, frequency spectrum analysis, sound pressure levels, sound wave propagation in air and water, models of sound sources (monopoles, dipoles, quadrupoles, line arrays), standing waves and mode shapes in (string, membranes, pipes), acoustics of large and small rooms, noise and vibration measurements, human hearing and psychoacoustics, loudspeaker design and performance, and other engineering applications. Taught 1 time to a total of 18 undergraduate students.

ACS-501, Elements of Acoustics and Vibration (3 lecture credits)

This is the vibration half of the two-course core fundamentals in acoustics sequence for first year graduate students, covering 1-DOF oscillators, impedance, 2-DOF and multi-DOF oscillator systems, longitudinal waves in solids, effects of boundary conditions and variations in material, vibration of strings with various boundary conditions, rectangular and circular membranes, flexural bending in beams and plates. Taught 8 times to a total of 117 resident and 200 distance graduate students.

ACS-502, Elements of Waves in Fluids (3 lecture credits)

This is the sound half of the two-course core fundamentals in acoustics sequence for first year graduate students, covering thermodynamic properties of fluids; the derivation of the linear acoustic wave equation; lumped element models; reflection and transmission; plane, spherical, and cylindrical waves; models of sound sources (monopoles, dipoles, quadrupoles, arrays, baffled piston); attenuation and absorption; plane waves in waveguides, standing waves in pipes, acoustic filters. Taught 5 times to a total of 69 resident and 100 distance graduate students.

ACS-515, Acoustics in Fluid Media (3 lecture credits)

This is the advanced theoretical fluid acoustics course, one of the core courses required of all acoustics graduate students. Topics include sources of sound: superposition of simple sources, free space Green's functions, dipoles and quadrupoles, multi-pole expansion, radiation of sound, Kirchhoff-Helmholtz integral theorem, Rayleigh integral, radiation from cylinders and spheres, scattering from cylinders and spheres, diffraction, sound sources in ducts, cavities, and rooms. Taught 6 times to a total of 86 resident and 92 distance graduate students.

ACS-519, Sound-Structure Interaction (3 lecture credits)

Vibroacoustic behavior of plate and shell structures surrounded by a fluid: flexural waves in beams, plates, and cylindrical shells; forced response, resonance, impedance, and mobility; sound radiation from vibrating structures; wavenumber transforms and the Rayleigh Integral; structural vibration induced by impinging sound waves; sound transmission loss through panels; coupled behavior of structures and enclosed acoustic volumes; Statistical Energy Analysis. Taught 1 time to a total of 13 resident and 13 distance graduate students.

ACS-537, Noise Control Engineering (3 lecture credits)

Source-path-receiver model, human hearing and psychoacoustics, human response to noise and vibration, sound quality metrics and criteria for quantifying noise, acoustic standards related to noise and vibration control, instrumentation for measuring and analyzing noise and vibration, noise sources (distributed sources, impact sources, flow noise), absorption (materials, measurement, placement), control of sound in large and small rooms, partitions and barriers, mufflers, and vibration control techniques. Taught 5 times to a total of 62 resident and 160 distance graduate students.

ACS-555, Acoustics of Musical Instruments (3 lecture credits)

An advanced exploration of aero-acoustics and vibro-acoustics applications to musical instruments. Musical intervals, acoustic impedance models for pipes and horns, nonlinear vibration of strings, acoustic radiation from structures, mechanisms of sound production by stringed instruments (plucked, struck, and bowed), percussion (drums, marimba), brass winds (lip reed, cylindrical bore, conical bore), woodwinds (flutes, single-reed, double reed). Taught 4 times to a total of 45 resident and 65 distance graduate students.

**ACOUSTICS
TEACHING AT
KETTERING
UNIVERSITY
(1995 TO 2011)**

ACOUSTICS COURSES DEVELOPED AND TAUGHT AT KETTERING UNIVERSITY (1995 – 1998)

ME-530/PHYS-580, Acoustics, Noise, and Vibration (3 lecture credits, 1 lab credit)

This course brought acoustics back to Kettering University after a 12-year absence. Developed lecture material and handouts covering derivation of wave equation for sound, radiation from sound sources (monopoles, dipoles, quadrupoles, baffled piston), microphones and sound level meters, intensity and sound power, human hearing, room acoustics and sound absorption, transmission loss in pipes and filters, 1-dof and 2-dof vibration, waves in bars and plates. Developed 10 laboratory experiments including source directivity, FFT analysis, sound intensity, reverberation time, impedance tube, acoustic filters, and modal analysis. Taught 5 times to a total of 95 students.

ACOUSTICS COURSES DEVELOPED AND TAUGHT AT KETTERING UNIVERSITY (1998 – 2001)

Popularity of courses in acoustics led to the development of two new courses, with in-depth study of acoustics topics.

PHYS-480, Fundamentals of Acoustics (3 lecture credits, 1 lab credit)

Modeled after an introductory graduate level course at Penn State, this course introduces students to sound waves in air. Developed lecture material and handouts covering wave phenomena, sound pressure levels, human hearing, frequency analysis, derivation of the acoustic wave equation, plane waves, spherical and cylindrical waves, intensity and impedance, radiation from sound sources (monopoles, dipoles, quadrupoles, baffled piston), room acoustics, sound absorption, transmission lines, acoustic filters. Developed laboratory experiments including measurements of sound speed, sound levels, human hearing, signal analysis and manipulation, FFT analysis, directivity, room acoustics, absorption and impedance tube, acoustic filters. Taught 6 times to a total of 66 students.

PHYS-580, Applied Structural Acoustics (3 lecture credits, 1 lab credit)

Modeled after an introductory graduate level course at Penn State, this course introduces students to oscillation, damped and forced response, base excitation and transmissibility, mechanical impedance, circuit analogies, loudspeaker design and analysis, vibration of strings and membranes, torsional and bending waves in bars, effects of

boundary conditions, waves in solids. Developed laboratory experiments including Chladni patterns, Theile-Small parameters for loudspeakers, plucked and struck strings, mechanical impedance, experimental modal analysis. Taught 3 times to a total of 21 students.

ACOUSTICS COURSES DEVELOPED AND TAUGHT AT KETTERING UNIVERSITY (2001 – 2007)

In 2001, Kettering University underwent a complete overhaul of its entire curriculum changing credit allocations, contact hours, and topical content in all degree programs. A new academic minor in acoustics was developed.

PHYS-382, Acoustics I: Sounds and Sources (4 lecture credits)

Developed and revised lecture content and handouts covering oscillation, damped and forced response of mechanical and acoustic oscillators, wave phenomena, sound levels, frequency analysis, human hearing, derivation of acoustic wave equation, plane waves, spherical and cylindrical waves, radiation from sound sources (monopole, dipole, quadrupole, linear arrays, baffled piston), radiation impedance, acoustics in large and small rooms, waveguides, end corrections, acoustic impedance and transmission lines, thermoacoustic refrigerators. Wrote 6 draft chapters for an acoustics textbook, used for this course. Taught 9 times to a total of 264 students.

PHYS-482, Acoustics II: Sound and Vibration (4 lecture credits)

Developed and revised lecture content and handouts covering damped and forced oscillation, nonlinear oscillation, transmissibility and vibration isolation, mechanical impedance and circuit analogies, loudspeaker design and frequency response, coupled 2-dof oscillation, dynamic absorbers, vibrating string with boundary conditions, plucked and struck string, rectangular and circular membranes, longitudinal and torsional waves in solids, flexural bending waves (derivation of equation of motion and application of boundary conditions), hoop modes in cylinders, transmission of sound through walls. Developed 9 mini-laboratory experiments to coincide with weekly lecture topics. Taught 8 times to a total of 81 students.

PHYS-484, Acoustical Measurements (4 laboratory credits)

Combined and revised laboratory experiments into a full-blown laboratory course covering topics in sound waves in air and structural vibration. Students performed 7 required experiments and an extended experimental project (room acoustics, modal analysis, response of a musical instrument, binaural hearing, etc.). Taught 2 times to a total of 14 students.

ACOUSTICS COURSES DEVELOPED AND TAUGHT AT KETTERING UNIVERSITY (2007 – 2010)

In 2007, the applied physics and engineering physics degree programs underwent significant curriculum revision including a complete redesign of the optics and acoustics minors to reflect needs of students with industrial co-op employers.

PHYS-302, Vibration, Sound and Light (4 lecture credits)

Developed new lecture course in waves with differential equations. Topics include oscillation in mechanical, electrical and acoustic systems, damping and resonance, wave motion, dispersive media, Fourier synthesis, mechanical waves, derivation of wave equation for sound waves and waves on strings, boundary conditions and standing waves, waveguide modes and evanescent waves, Doppler effect and waves in 3D, electromagnetic waves in coaxial cable, wave equation for EM waves, EM waves in dielectric materials and conductors, interference and diffraction. Taught 6 times to a total of 69 students.

PHYS-388, Acoustics in the Human Environment (4 lecture credits)

Assisted colleague Dan Ludwigsen in the development of a new science elective course aimed at industrial applications of acoustics that Kettering students might encounter at their co-op jobs or everyday life. Computer simulations (using Audacity, Raven, MATLAB) explore recording and manipulating audio signals physiology and psychology of hearing, fundamentals of signal analysis, sound quality as a means of relating acoustic metrics to perception of performance, and the acoustics of rooms, listening spaces, and outdoor environments. Group projects encourage students to take the role of a consultant, learn by case studies and provide solutions to client problems. Taught 2 times to a total of 17 students.

PHYS-485, Acoustic Testing and Modeling (4 laboratory credits)

Developed new advanced laboratory course utilizing a three-fold approach to investigating an acoustic problem including theoretical models, computational models (COMSOL Multiphysics) and experimental results (STAR Modal). Two five-week modules explore an air-borne sound problem and a structural vibration problem. Each module begins with essential laboratory techniques, development of theoretical fundamentals and computational tutorials. Each module culminates in an investigation of a complex phenomenon, such as the vector sound intensity around a tuning fork, or the structural vibration of a baseball bat or tennis racket. Experimental results are used to refine finite element computer models both expand on approximate theoretical models. Much of the student work is done in teams, but a substantial part of the course grade comes from rubric-based evaluation of mandatory laboratory notebooks. Taught 5 times to a total of 28 students.

PHYSICS TEACHING AT KETTERING UNIVERSITY (1995 TO 2011)

PHYSICS COURSES TAUGHT AT KETTERING UNIVERSITY FROM 1995 TROUGH 2001

PHYS-110, Mechanics (3 lecture credits) Taught 3 times to 181 students

PHYS-111, Newtonian Mechanics Laboratory (1 Laboratory credit)

PHYS-220, Electricity & Magnetism (3 lecture credits) Taught 12 times to 420 students

PHYS-221, Electricity & Magnetism Laboratory (1 Laboratory credit) Taught 2 times to 38 students

PHYS-230, Waves (3 Laboratory credit) Taught 4 times to 160 students

PHYS-231, Waves Lab (1 Laboratory credit) Taught 2 times to 46 students

PHYSICS COURSES TAUGHT AT KETTERING UNIVERSITY FROM 2002 TROUGH 2009

PHYS-114, Newtonian Mechanics (4 lecture credits) Taught 10 times to 402 students

PHYS-115, Newtonian Mechanics Laboratory (1 Laboratory credit) Taught 11 times to 230 students
PHYS-224, Newtonian Mechanics (4 lecture credits) Taught 13 times to 482 students
PHYS-225, Newtonian Mechanics Laboratory (1 Laboratory credit) Taught 9 times to 161 students
PHYS-235, Computers in Physics (3 Lecture Credits) Taught 2 times to 9a students
PHYS-412, Theoretical Mechanics (4 lecture credits) Taught 1 time to 5 students
PHYS-498, Senior Research (4 Laboratory Credits) Taught 1 time to 3 students

EDUCATIONAL WWW SITES (ANIMATIONS, VIDEOS & ARTICLES)

Acoustics and Vibration Animations <http://www.acs.psu.edu/drussell/demos.html>

60+ webpages with animations illustrating vibration and wave phenomena. Animations created with *Mathematica* to show physically correct acoustic processes are accompanied by explanatory text. Current site receives between 6,000-10,000 visits per month.

Original site (www.kettering.edu/~drussell/demos.html) had over 2 million visits between 2001-2011.

THIS ACOUSTICS ANIMATIONS WEBSITE HAS BEEN REVIEWED IN THE FOLLOWING PUBLICATIONS:

Ear and Hearing, **31** (4), p. 585-586 (2010).

The Physics Teacher, **43** (1) p. 57 (2005) with correction in *Phys. Teach.*, **43** (3) p. 190 (2005).

Physics Today, **56** (5), p. 29 (2003).

Science, **293**, p. 1563 (August 31, 2001)

Sound & Communications, **21** (2), p. 18 (2000).

THIS ACOUSTICS ANIMATIONS WEBSITE HAS ALSO RECEIVED THE FOLLOWING AWARDS:

2002 Science-Web Award (<http://www.science-web-award.com/>)

5-star peer-review rating from MERLOT (<http://www.merlot.org>)

5-star rating by Schoolzone (<http://www.schoolzone.co.uk>)

Yahoo! Pick of the Week for 8-27-2001

Physics and Acoustics of Baseball and Softball Bats <http://www.acs.psu.edu/drussell/bats.html>

25+ articles summarizing the physics of the bat-ball collision and the vibration and acoustic signatures of baseball and softball bats.

YouTube Channel – Acoustics Demos <http://www.youtube.com/drdanku>

70+ videos showcasing demonstrations of acoustics and vibration phenomena. Channel has 2670 subscribers and 1.37 million views since 2007.

OTHER PRESENTATIONS BEFORE PROFESSIONAL SOCIETIES

- D. Russell, "Indirect methods of assessing bat performance," invited presentation before the Sporting Goods & Manufacturers Association Baseball & Softball Council Fall Meeting, Dallas, TX, September 29 - October 1, (2005).
- D. Russell, "Correlation between hoop frequency and performance," invited presentation before the Sporting Goods & Manufacturers Association Baseball & Softball Council Fall Meeting, Dallas, TX, October 1-3, (2004).
- D. Russell, "Progress report on hoop frequency and a portable pendulum test," presented at the annual meeting of the Baseball/Softball Equipment Subcommittee F08.26 of the ASTM, Salt Lake City, UT, May 18-20, (2004).
- D. Russell, "Tuning a bat to optimize the trampoline effect," presented at Sporting Goods & Manufacturers Association Baseball & Softball Fall Meeting, Dallas, TX, Oct. 2-4, (2003).
- D. Russell, "Making Waves on the World Wide Web," paper CF-7 presented at the Fall meeting of the Ohio Section of the American Physical Society, Athens OH, November 1-2 (1996).

GUEST LECTURES, KEYNOTE ADDRESSES, INVITED SEMINARS

Ross Family Science Lecture Series – St. John Fisher University

- D. Russell, "Swing, Sting, and Ping: How Sound and Vibration Influence Perceived Performance of Hand-held Sports Equipment," ASA Webinar Series (online), June 22, 2023. 300 registered.
- D. Russell, "SWING, STING, & PING: Acoustics and Vibration assessment of perception of performance and feel for sports implements." May 11, 2022. Invited seminar for 25 engineers at PING Golf Inc.
- D. Russell, "Swing, Sting, and Ping: Physics (Acoustics and Vibration) of Hand-Held Sports Equipment," Thomas P. Johnson Distinguished Visiting Scholar Lecture, Rollins College, Winter Park, FL, October 20, 2020. 65 students and faculty in attendance.
- D. Russell, "Recent Trends in Materials and Designs for the Reduction of Vibration and Noise in Hand-Held Sports Equipment," National Academy of Engineering Workshop "Advances in Noise Control Engineering," October 19-20, 2021. (virtual)
- D. Russell, "Acoustics of Ping-Pong," Society of Physics Student National Seminar Series (virtual). 45 attendees, 500 views. <https://www.youtube.com/watch?v=ekalYkdrwI8> (September 24, 2020).
- D. Russell, "Physics (Acoustics and Vibration) of Hand-Held Sports Equipment," Brigham Young University Physics Colloquium, BYU Physics and Astronomy Dept., Provo, UT (September 21, 2019). 95 in attendance.
- D. Russell, "Making Acoustics and Vibration Concepts Accessible Through the Use of Animations," SAE International 2019, Society of Automotive Engineers, Grand Rapids, MI, Keynote Address (June 13, 2019). 1000 in attendance.
- D. Russell, "Animations as educational tools for understanding the acoustics of musical instruments," CIRMMT Distinguished Lecture Series, Centre for Interdisciplinary Research in

Music Media and Technology, Schulich School of Music, McGill University, Montreal, Quebec, Canada. (March 21, 2019). 85 in attendance, Invited. Recording posted to CIRMMT YouTube channel: https://www.youtube.com/watch?v=nl2q_g_Mors (611 views).

- D. Russell, "Teaching a Graduate Level Course on the Acoustics of Musical Instruments," CIRMMT Workshop on Education in Acoustics, Centre for Interdisciplinary Research in Music Media and Technology, Schulich School of Music, McGill University, Montreal, Quebec, Canada, (March 21, 2019). 40 in attendance.
- D. Russell, "Structural Acoustics of Sports Equipment," Lecturer for the 2014 ASA School *Living in the Acoustic Environment*, Providence, RI, May 3-4, 2014.

GRANTS AND PROPOSALS

Easton Baseball – Vibration Assessment of Baseball Bats for Feel and Indirect Performance	\$30,000	2019
Ritual Hockey – Vibration Assessment of Field Hockey Sticks	\$5,000	2019
Nike Golf – Acoustics of Golf Clubs (D.A. Russell and E. Handley)	\$18,000	2015 – 2016
Penn State College of Engineering Instructional and Research Equipment Grant	\$24,950	2015
Sporting Goods Manufacturers Association – Indirect Methods of Testing Softball Bats	\$25,000	2005 – 2009
Gibson Guitars — "Proposal to Gibson Musical Instruments for Developing an Acoustics Laboratory at GMI Engineering & Management Institute," (funding includes donated software, musical instruments, and \$36,000 non-recurring retainer)	\$58,500	1998
GMI Research Initiative / Improvement grant – "Experimental methods for determining the mass-frequency distribution of a fuzzy substructure"	\$5,000	1997
NSF (ILI-IP) – D. A. Russell and T. M. Cameron, "Applied Physics Acoustics Laboratory," proposal #DUE-9751029 (not funded)	\$32,571	1996

CONSULTING

Modal Analysis and Softball Bat Testing for Easton Sports	\$3000	2010
Modal Analysis of Baseball Bats for RX Sports	\$850	2010
Vibration Analysis of Field Hockey Sticks – STX Field	\$1,950	2009
Vibration Analysis of Baseball & Softball Bats for PowerMetal Inc.	\$2,150	2007
Vibration Analysis of Baseball/Softball Bats for various bat companies: Nike, Reebok, Easton, Worth, DeMarini, Miken, Louisville Slugger, Mattingly Baseball, R2L Sports	\$13,000	2004 – 2009
Analysis and Optimization of Harmonic Damper for Marucci Bats	\$9,500	2004 – 2010
Modal Analysis of Baseball/Softball Bats for CE Composites	\$7,500	2002 – 2003
Modal analysis of golf club shafts for Gallaway Golf	\$2,000	1997

AWARDS & HONORS

Penn State Engineering Alumni Society Outstanding Teaching Award – 2022
 Acoustical Society of America Student Council David Blackstock Mentor Award – 2017
 Rhodes Professor Award – *Kettering University* – 2007
 Educational Scholar Award – *Kettering University Center of Excellence for Teaching and Learning* – 2001
 Outstanding Teacher of the Year – *Kettering University Alumni Association* – 2000
 Faculty Member of the Year Award – *ΦΔΘ Fraternity, Kettering University* – 1996
 ASA Structural Acoustics and Vibration Best Student Paper Award – 1995
 Eugen J. Skudrzyk Memorial Award, *Pennsylvania State University* – 1995
 Kenneth T. Simowitz Memorial Citation, *Pennsylvania State University* – 1995
 Acoustical Society of America Fellowship, *Physical Acoustics Summer School* – 1994
 College of Engineering Dean's Fellowship, *Pennsylvania State University* – 1991-1994
 A.I.P. Summer Internship Program Finalist – 1989
 Bradley University Phi Kappa Phi Academic Hall of Fame (1 of 5 inductees) – 1988-89
 Outstanding Senior in Physics, *Bradley University* – 1988-89
 Ising Physics Scholarship, *Bradley University* - 1987
 Pi Sigma Physics honor society, *Bradley University* – 1987
 Phi Kappa Phi honor society, *Bradley University* – 1986

AWARDS WON BY STUDENTS I HAVE ADVISED

Peter Kerrian – Best Student Paper Award, 1st place, Structural Acoustics and Vibration, ASA 171, Salt Lake City, (2016)
 Kritika Vayur – Best Student Paper Award, 1st place, Structural Acoustics and Vibration, ASA 169, Pittsburgh, (2015)
 Corey Taylor – Best Student Paper Award, 1st place, Musical Acoustics, ASA 169, Pittsburgh, (2015)

PROFESSIONAL SOCIETY MEMBERSHIP AND SERVICE

MEMBERSHIPS IN PROFESSIONAL SOCIETIES

Acoustical Society of America (ASA)	1990 – present
American Association of Physics Teachers (AAPT)	1997 – present
Institute for Noise Control Engineering (INCE)	2012 – present
American Society of Testing Materials (ASTM International)	2005 - 2010
American Society of Engineering Education (ASEE)	2001 – 2004, 2023 – present
Sigma Xi, Scientific Research Society	1991 – 2005
Society of Physics Students (Kettering University Faculty Advisor)	1987 – 2011

COMMITTEE MEMBERSHIP AND SERVICE

Acoustical Society of America (ASA) Committee on Education in Acoustics	1997 – present
Chair, ASA Administrative Committee on Education in Acoustics	2018 – 2024
During my tenure as chair, the Education in Acoustics Committee was elevated from an administrative committee to a Technical Specialty Group, enroute to becoming a full Technical Committee	
ASA Musical Acoustics Technical Committee	2000 – present
ASA Structural Acoustics and Vibration Technical Committee	2012 – present
ASA Physical Acoustics Technical Committee	2021 – present
ASA Web Advisory Committee	2017 – 2019
ASA Ad-Hoc Committee on Online Education	2000 – 2006
ASA Selection Committee for Rossing Prize in Acoustics Education	2004 – 2008
Chair of Selection Committee for Rossing Prize in Acoustics Education	2019 – 2024
ASA representative to AIP Liaison Committee on Education	2020 – 2023
ASTM Subcommittee F.08.26 Baseball and Softball Equipment	
USA Baseball – Bat Advisory Committee	2005 – 2010 2008 – 2015

REVIEWER / EDITOR FOR JOURNALS

Guest Associate Editor: JASA Special Issue: Education in Acoustics (40 papers)
Occasional reviewer for *Am. J. Phys.*, and *J. Acoust. Soc. Am.*
Associate Editor (Education) for Proceedings of Meetings on Acoustics (POMA)

2021 – 2022
2008 – present
2019 – 2022

SPECIAL SESSIONS ORGANIZED — ACOUSTICAL SOCIETY OF AMERICA.

ASA 187, Virtual, Nov. 19-21, 2024 – Session 3pED, “Where Do You Get Your Inspiration?”
ASA 186, Ottawa, May 13-17, 2024 – Session 2pED, “A Potpourri of Classical and Unusual Materials and Demonstrations”
ASA 186, Ottawa, May 13-17, 2024 – Session 3aSA, “My Favorite Homework Problems in Structural Acoustics and Vibration”
ASA 186, Ottawa, May 13-17, 2024 – Session 4pED, “Teaching Acoustics With (or Without) Math”
ASA 186, Ottawa, May 13-17, 2024 – Session 5aNS, “Pickleball Noise”
ASA 184, Chicago, May 8-12, 2023 – Session 2aPAb, “Acoustics Demonstration Extravaganza”
ASA 184, Chicago, May 8-12, 2023 – Session 2pED, “Assessment of Acoustics Education”
ASA 184, Chicago, May 8-12, 2023 – Session 5aED, “Resources for Teaching Waves in a Physics Class”
ASA 183, Nashville, Dec. 5-9, 2022 – Session 3aPAb, “My Favorite Homework Problems (Based on Measurements, Demonstrations, or Experimental Data).”
ASA 183, Nashville, Dec. 5-9, 2022 – Session 4pED, “Connecting Industry and Education (Part 2)”
ASA 182, Denver, May 23-27, 2022 – Session 2p#D, “Connecting Industry and Education (Part 1)”
ASA 181, Seattle, Nov. 28-Dec. 3, 2021 – Session 1aED, “Returning to Teaching Acoustics In-Person in the Post-COVID Era”
ASA 181, Seattle, Nov. 28-Dec. 3, 2021 – session 4pED, “Preview of the next JASA Special Issue on Education in Acoustics”
ASA 180, Acoustics in Focus, June 8-20, 2021 – session 1pED, “Reflections on Teaching Acoustics During a Pandemic”
ASA 179, Acoustics Virtually Everywhere, Dec. 7-11, 2020 – session 1pED, “Acoustics Demonstrations for Classroom Use”
ASA 178, San Diego, November 2-5, 2019 – session 2aEDa, “Mentoring Graduate and Undergraduate Students”
ASA 178, San Diego, November 2-5, 2019 – session 4pEDa, “Selecting a Textbook for Teaching an Acoustics Course”
ASA 177, Louisville, KY, May 13-17, 2019 – session 3pNS, “Noise at Sporting Events and Sports Venues”
Acoustics '17, Boston, MA, June 26-30, 2017 – session 5pED, “Teaching Tips for New (or Not So New) Acoustics Faculty Members”
Acoustics '17, Boston, MA, June 26-30, 2017 – session 3aMU, “Session in Honor of Thomas D. Rossing”
Acoustics '17, Boston, MA, June 26-30, 2017 – session 5aSAb, “Acoustics and Vibration of Sports and Sports Equipment”
ASA 169, Pittsburgh, PA, May 18-22, 2015 – session 3aED, “Preparing Graduate Students for Careers in Acoustics”
ASA 169, Pittsburgh, PA, May 18-22, 2015 – session 4pSA, “Demonstrations of Structural Acoustics and Vibration”
ASA 138, Columbus, OH, November 1-5, 1999 – session ED, Undergraduate Laboratory Experiments

STUDENT THESES ADVISED & COMMITTEE MEMBERSHIP

PH.D. STUDENTS ADVISED (PENN STATE, 2011-PRESENT)

- Ph.D. Advisor for Noah Parker, "Interactive Tools for Acoustics Education in Undergraduate Engineering Courses," The Pennsylvania State University, (2022-present)
- Ph.D. committee chair and co-advisor for Edward Zechmann, "Characterization of impulsive noise sources using kurtosis corrected sound power and relating the sound power to the risk of hearing impairment," The Pennsylvania State University, (2014-2019)
- Ph.D. committee chair and co-advisor for Whitney L. Coyle, "Study of the acoustical properties of the clarinet in order to characterize the ease of playing," Ph.D. The Pennsylvania State University, (2012-2016). Dr. Coyle is currently a tenured Associate Professor of Physics at Rollins College.

M.S. AND M.ENG. STUDENTS ADVISED (PENN STATE, 2011-PRESENT)

- Kathryn Krainc, "Vibrational Analysis of Ash and Composite Hurleys," M.S. The Pennsylvania State University (2019-2020)
- Andrew Kinzie, "Acoustic Characterization of Penn State Recording Studio A, Above and Below the Schroeder Frequency," M.S. The Pennsylvania State University (2016-2017)
- Peter A. Kerrian, "Acoustic and Vibrational Analysis of Golf Club Drivers," M.S. The Pennsylvania State University (2015-2016)
- Corey Taylor, "Experimental Analysis of an Acoustic Guitar," M.Eng., The Pennsylvania State University (2013-2015)
- Kritika Vayur, "Vibrational Analysis of Hollow and Foam-Filled Graphite Tennis Rackets" M.Eng., The Pennsylvania State University (2013-2015)

PH.D. DISSERTATION COMMITTEE MEMBER (PENN STATE, 2011-PRESENT)

- Kourtney Libenow, "Development and uncertainty quantification of multiple surrogate models for structural vibration," Ph.D., The Pennsylvania State University (2024-present)
- Zachary Jones, "Resultant and Distributed Unsteady Force Reconstruction using Force Gages and Accelerometers" Ph.D., The Pennsylvania State University (2021-2024)
- Jason Sammut, "Shock Profile Replication of Medium Weight Shock (MWS) Testing for Simulation and Improved Design Capabilities," Ph.D., The Pennsylvania State University, (2020-2022)
- James Chatterley, "The Use of Pulse Waves to Increase Carbon Nanotube Thin-Film Thermophone Efficiency," Ph.D., The Pennsylvania State University, (2016-2022)
- Yoo Xiong, "Acoustic Black Hole Systems," Ph.D., The Pennsylvania State University, (2019-2021)
- Mathew Neal, "A Spherical Microphone and Compact Loudspeaker Array Measurement Database for the Study of Concert Hall Preference," Ph.D., The Pennsylvania State University, (2016-2019)
- Martin Lawless, "Emotional Response to Room Acoustics through f-MRI," Ph.D., The Pennsylvania State University, (2015-2018)
- Tae Kwang Yoo, "Field Testing and Numerical Investigation of Streetscape Vehicular Anti-Ram Barrier under Vehicular Impact using FEM and Coupled FEM=SPH Simulations," Ph.D., The Pennsylvania State University, (2005-2018).
- David Dick, "Listener Envelopment in Concert Halls," Ph.D., The Pennsylvania State University, (2014-2017)

UNDERGRADUATE B.S. THESIS SUPERVISION (PENN STATE, 2011-PRESENT)

- Robert Suder, "Experimental modal analysis on baseball bats: how damping rates affect a bat's overall feel," B.S. Schreyer's Honors Thesis, (2018)

UNDERGRADUATE B.S. THESIS SUPERVISION (KETTERING UNIVERSITY, 1995 – 2011)

Kettering University requires undergraduate students to complete a thesis on a topic of interest to the student's co-op employer. The Kettering faculty and the employer advisor mentor the student together. Though most of the work is usually done at the employer's facility, the Kettering faculty member usually contributes expertise, visits the industrial facility, and coaches the writing.

**SERVICE AND
CITIZENSHIP
UNIVERSITY &
DEPARTMENT**

Penn State Acoustics Ph.D. Qualifying Exam Committee Chair (2013-2020)	2011–2023
Penn State Graduate Program in Acoustics Admissions Committee Chair (2015-present)	2011–present
Penn State Graduate Program in Acoustics Curriculum Committee Chair (2019-2023)	2019–present
Penn State College of Engineering Non-Tenure Track Faculty Promotion Committee - Chair (2018, 2024)	2018–2019, 2024–2025
Faculty Advisor, PSU Student Chapter Acoustical Society of America	2012–present
Faculty Advisor, Society of Physics Students and ΣΠΣ honor society	1996–2011
Kettering University Faculty Senate – senator for 6 years	2000–2006
Kettering University Promotion, Tenure and Ethics Committee	2008–2011
Faculty Host for Discover Kettering (lab tours for prospective students)	1995–2011
